| Business Description / History                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                  |                       |
| <p>A.Co. Corporation, headquartered in Dubai, UAE, is a global leader in providing professional and technical solutions that deliver safe, well-executed, and capital efficient projects to clients globally. A.Co. Corporation was officially incorporated in Dubai in September 2000; however, through its predecessors, the company has been in business for more than a century.</p> <p>A.Co. specializes in delivering professional and technical solutions to a wide range of industries, including energy, infrastructure, mining, metals, advanced technologies, manufacturing, life sciences, and government services. The company has a backlog of AED 28.7Bln with new awards of AED 5.8 Bn. The company's services fall into 6 broad categories and can range from basic consulting activities, often at the early stages of a project, to complete design-build, operations and maintenance contracts.</p> <p>1. Engineering and Design:<br/>Developing solutions to address clients' most complex problems. Engineering services range from traditional engineering disciplines such as piping, mechanical, electrical, control systems, civil, structural and architectural to advanced engineering specialties including process engineering, chemical engineering, simulation, integrated automation processes and interactive 3-D modeling.</p> <ul style="list-style-type: none"><li>• The company, through their design solutions, can provide clients with varied offerings which can include front-end engineering, conceptual design, estimating, feasibility studies, permitting, process simulation, technology and licensing evaluation, scope definition and siting.</li></ul> <p>2. Project Management:<br/>Managing all aspects of the effort to deliver projects on schedule and within budget. The company is often hired as the overall program manager on large complex projects where various contractors and subcontractors are involved and multiple activities need to be integrated into an execution plan to ensure the success of the overall project.</p> <p>Such services include logistics, development of project execution plans, detailed schedules, cost forecasts, progress tracking and reporting, and the integration of EPC efforts.</p> <p>3. Procurement<br/>Supply chain solutions aimed at improving product quality and performance while also reducing project cost and schedule. Company benefits from their supply expertise, global purchasing power, technical knowledge, processes, systems and experienced global resources.</p> <p>Procurement activities include strategic sourcing, material management, contracts management, buying, expediting, supplier quality inspection and logistics.</p> <p>4. Construction<br/>Mobilizing, executing and commissioning projects on a self-perform and/or subcontracted basis. Company is responsible for the completion of a project, often in difficult locations and under challenging circumstances.</p> <ul style="list-style-type: none"><li>- A.Co. is designated as program manager, and serve as such in cases where the client has facilities in multiple locations, complex phases in a single project location, or a large-scale investment in one facility.</li></ul> <p>5. Operations and Maintenance Services</p> |                                  |                       |

Enhancing the efficiency of or extending the life of clients' facilities. This may include the delivery of services to include facility management, technical facility operations, plant readiness, commissioning, start-up and maintenance technology, small capital projects, turnaround and outage services and recapitalization of facilities and infrastructure.

- Providing key management, staffing and management skills to clients on-site at their facilities.

#### 6. Fabrication and Modularization Services

- Integrated engineering and modular fabrication and assembly, as well as modular construction and asset support services to clients around the globe from their joint ventures.
- By leveraging internal and third-party capabilities in key regions of the world, A.Co. helps clients achieve cost and schedule savings by reducing on-site craft needs and shifting work to inherently safer and more controlled work environments.

A.Co. operates its business through three principal segments: Energy Solutions, Urban Solutions, and Mission Solutions, with an additional smaller other segment.

A.Co. has maintained a steadfast commitment to sustainability and ethical practices. The company integrates environmental stewardship and community engagement into its operations, aiming to create a positive impact on the world.

The company has a presence in over 60 countries, with offices in 25 of them.

### Ownership

The shareholding type of A.Co. Corporation is heavily skewed toward institutional ownership, which accounts for 77.53% of total shares. This dominance suggests that the company is primarily held and influenced by large investment firms, mutual funds, and financial institutions, reflecting a high level of investor confidence and market credibility.

Institutional ownership often brings stability, long-term investment strategies, and active governance oversight.

Meanwhile, individual investors represent a small portion, at just 1.48%, indicating limited retail participation. Overall, the shareholding type indicates a well-established public company with a strong institutional backing and relatively minimal speculative or retail influence.

The company has a single class of stock (Stock A), totaling 171,515,867 shares, with an impressive free float of 98.65%.

Institutional investors dominate the ownership landscape, holding 77.53% of the company's shares. Other shareholder categories include individuals (1.48%), BBB Corp. (3.81%), and a combined 8.71% categorized as unknown. This significant institutional ownership suggests strong market confidence and potential influence from major asset managers in company governance and strategy.

### Board of Directors

A Co. BOD comprises of diverse group of experienced professionals dedicated to guiding the company's strategic direction and upholding shareholder interests.
